Lumion 10.5

Beautiful renders within reach

Breathe life into your 3D designs

With intuitive rendering tools and effects, Lumion makes it easy to unveil the beauty of your design and create compelling images, videos and 360 panoramas.

Try Lumion for free

Lumion is 3D rendering software made especially for architects and designers. If you have a 3D model of your design, Lumion can help you quickly bring it to life and show it in a richly detailed, captivating environment.

No matter how you want to convey the beauty of your design, Lumion can help you do it yourself, quickly and without specialized training.

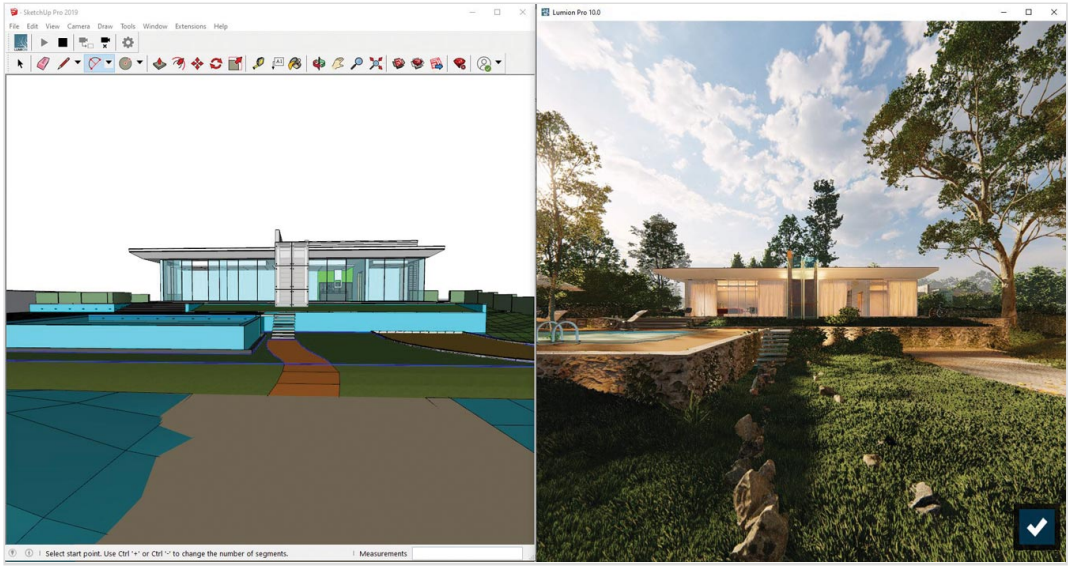
More time to design, less time waiting for renders.

Rendering was once a slow and tedious process. With Lumion, everything's better.

From importing a CAD model to rendering a standout result, the whole process now takes only a few hours. And if you need to update a render on-the-fly, you can reconnect your model, adjust the render settings, and show

your client a brand new, beautiful result, all in a matter of minutes.

You can even model and visualize simultaneously with LiveSync, helping you design in the context of real-life environments.



Build living environments, from the forest to the city.

See your designs in the context of the real world with Lumion's comprehensive scene-building tools and effects.

From the densely forested landscape to the urban scene, you can find over 5,600+ objects including fine-detail trees and shrubbery, cars, people, interior furnishings, exterior objects and more.

Over 1,200+ materials are also available in the Lumion Pro version*, giving you the ability to instantly assign stunning glass, plaster, wood, metal, fabrics and more.

*Lumion has about 33% of the content library (materials and objects) found in Lumion Pro.

Create 360 panoramas

Lumion is designed to be effortless, transparent and stress-free.
Backed by more than 10 years of development, Lumion comes complete with everything you need for placing your design in its local context.

You can dress a model with materials. Furnish interiors and exteriors. Communicate lighting and shadow. If you can dream it, you can do it in Lumion.

From your 3D model to a photorealistic result full of life, color and beauty, Lumion helps you get the job done faster than most 3D rendering programs out there.

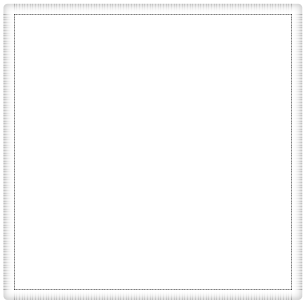
Simply import a model. Build a scene for a realistic or conceptual result. Add effects to impart a feeling and capture an idyllic view of your design. And render.

Simple images can render in as little as 30 seconds, while animations require only a couple of hours for a 30fps video. Plus, with presets such as *Styles*, *Real Skies* and *3D Grasses*, Lumion makes it easy to show your design in its future setting and communicate the vision behind your project.

See what's inside Lumion

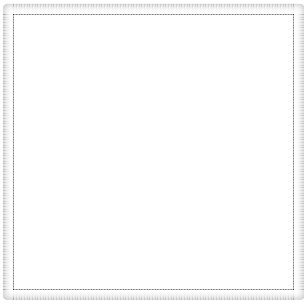
No previous training in rendering solutions? No worries! Lumion prioritizes efficient, streamlined functions to help architects and designers produce beautiful results without a need to outsource or hire a visualization expert. After just 15 minutes of using Lumion, you'll be transforming your designs into beautiful renders.

Watch a Lumion 10 overview



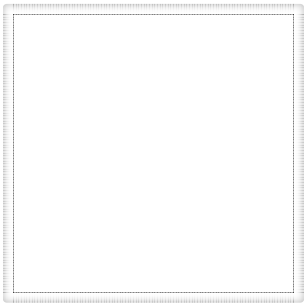
"[Lumion] really changes the way we communicate because we can iterate much faster through the process."

Jamie Maslyn Larson
Director of Landscape,
BIG NYC



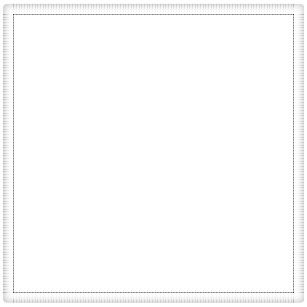
"With Lumion, everything is possible. If you can do it in real life, you can do it in Lumion."

Mathieu Anfosso
Creative Director, TEN
OVER MEDIA



"During design development, we're using Lumion as a tool to convey to clients the emotion and feeling about their project, and how it will enhance their lives."

Stephen Eich
Urban Studio Director,
Hollander Design



"In the span of three days, I taught myself the program, I rendered a high school, and I produced the animation for it."

Jacqueline Warner
Director, Technology,
Pfluger Architects
