

On the Home Screen you are able to manage your devices, loops, contents, and schedules.

In the Screens section you can see your online/offline devices and device groups.

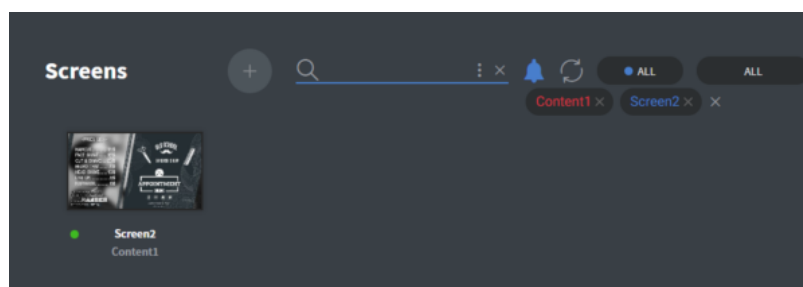

You can add screens and screen groups by clicking on the  button.

For more information see: [Register a new device](#).

You can search for screens by their name, assigned content, tag, or MAC address.

You can set multiple search criteria at once.

With the  button you can set every device in the current group to emergency state.

For example, if you are in Group1 and you click on the button, every screen in Group1 will be set to emergency state. However, if you click on the button when you are in the outermost group (root), every screen will be set to an emergency state.

With the  button you can refresh the data on all of your screens.

With the All / Online / Offline buttons you can filter out the online or offline screens or show both of them.

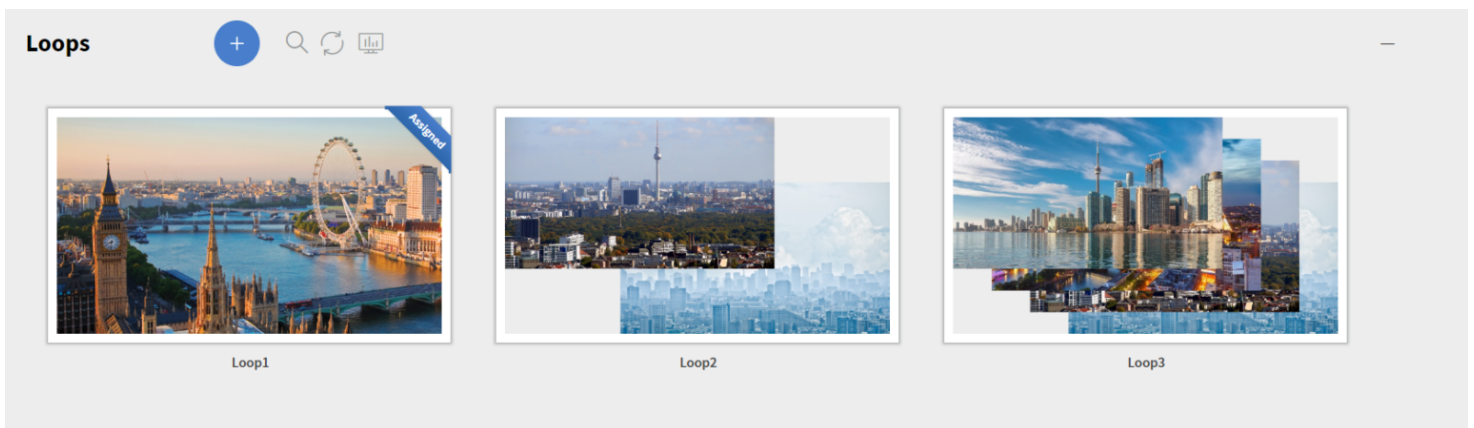

With the All / Assigned / Unassigned button you can filter out those screens which have /do not have an assigned content or show both of them.

If you right click on a screen or screen group a context menu will appear where you are able to manage the screen or screen group. For more information see: [Managing Screens](#).

You can assign loops, contents, and schedules by dragging and dropping them onto the screens. You can also do it from the context menu.

In the Loops section you can create and manage your loops.

With the  button you can create new loops.

With the  button you can search for loops by their name.

With the  button you can refresh the loop section.

With the  button you can download the proof of play of loops. For more information see: [Asset reporting](#).

The Assigned ribbon in the top right corner of the loop is showing that it is assigned to a screen. Assigned loops cannot be deleted.

If you right click on a loop a context menu will appear where you are able to manage it.

In the Contents section you can create and manage your contents.

Contents

Content Group1

Content1

Content2

Content3

With the  button you can create new contents and content groups.
